Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	Yes
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes

10	Demo video or walkthrough (if required)	Yes
----	---	-----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

HDI_Prediction_System/

```

|— app.py
|— model.pkl
|— scaler.pkl
|— requirements.txt
|— README.md
|— dataset.csv
|— templates/
|   └─ index.html
|— static/
|   └─ css/
|   └─ images/
|— uploads/
└─ models/
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	http://127.0.0.1:5000
Login Credentials (Demo)	
Platform / Hosting Provider	Local Machine

Repository Link	https://github.com/vemuri-Jyoshna/A-Comprehensive-Measure-of-Well-Being-.git
Demo Video Link	https://drive.google.com/file/d/12U8aWEn3hJwxpj4QZI_SfVP5i92AYpvf/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Install Python 3.10 or above.
2. Open the project in VS Code.
3. Open Terminal.
4. Install dependencies:

```
pip install -r requirements.txt
```
5. Run the application:

```
python app.py
```
6. Open the browser and visit:

```
http://127.0.0.1:5000/
```
7. Enter the required values and click Predict.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on dataset quality	Can be improved with more data
2	Works only with supported input format	Validate inputs before prediction
3	No user authentication	Can be added in future versions
