

Problem-Solution Fit

Date	04 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] Government agencies, policymakers, researchers, NGOs, students, international organizations (e.g., UNDP)	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] Limited budget, lack of technical expertise, limited computing resources, inconsistent data quality	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Manual analysis, spreadsheets, statistical reports. Pros: Simple and familiar. Cons: Slow, less accurate, no predictive capability
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] Difficulty predicting HDI trends, manual data analysis is time-consuming, delayed policy decisions, frequent need for updated insights	9. PROBLEM ROOT / CAUSE [RC] Large and complex datasets, lack of predictive tools, dependence on manual calculations, delayed data processing	7. BEHAVIOR + ITS INTENSITY [BE] Frequently analyze datasets, compare indicators, generate reports, monitor development trends

3. TRIGGERS TO ACT [TR] New socio-economic data released, policy planning, annual HDI reports, research projects	10. YOUR SOLUTION [SL] An AI/ML-based HDI Prediction System that analyzes socio-economic indicators, predicts future HDI values, visualizes trends through dashboards, and supports faster, data-driven policy decisions.	8. CHANNELS OF BEHAVIOR [CH] ONLINE Government portals, UNDP datasets, web dashboards. Offline: Research institutions, universities, policy meetings
4. EMOTIONS BEFORE / AFTER [EM] Before: Confused, uncertain, overwhelmed. After: Confident, informed, data-driven		OFFLINE
